CourseCorrect User Guide: *A Web-Based Platform For Career Development*

1. About This Guide

What this guide covers

This guide provides comprehensive instructions for using CourseCorrect. CourseCorrect is a web-based, AI-powered platform that recommends career development courses. The guide serves new users requiring initial setup guidance and existing users accessing advanced platform features.

2. Introduction to CourseCorrect?

2.1 What is CourseCorrect?

CourseCorrect is an AI-powered course matchmaker designed to help ambitious learners find the right upskilling course to move their careers forward. CourseCorrect's AI (called Cora) matches users with the best fit for their specific goals, skills, and experience level. The platform scans over 150,000 courses across platforms like Udemy, Coursera, and EdX, comparing content, reviews, pricing, and skills taught to make personalized recommendations.

2.2 Key Features overview (benefits)

Course Search & Aggregation

- Search functionality that pulls courses from 150,000+ options across multiple platforms.
- Results display up to 20 relevant courses per search query.

AI Course Matching (Cora)

- Personalized recommendation system that matches courses to your profile.
- Quick assessment process that generates tailored suggestions in under 2 minutes.

Career Outcomes Analysis

- Course listings include skills taught and potential career paths.
- Salary expectations and job role information for each recommended course.

Multi-Platform Integration

- Consolidated access to courses from Udemy, Coursera, EdX, and other platforms.
- Comparison tools for pricing, content, and reviews across different providers.

2.3 Target Audience?

CourseCorrect is desgined for anyone looking to advance their skills and career through online learning:

Career Changers

People transitioning to new industries or roles who need strategic guidance and courses on skills to develop that will support their career pivot.

Busy Learners

Users who need efficient course discovery without extensive research. CourseCorrect's AI recommendations reduce the time spent comparing courses and recommended courses across multiple platforms, providing curated options based on your needs and goals.

Students and Lifelong Learners

Students preparing for career entry and recent graduates who need to identify relevant courses that align with their career goals and enhance their capabilities. This includes both structured learners supplementing formal education and self-directed learners exploring specific interests or hobbies.

Professionals

Established professionals focused on continuous learning, leadership development, or specialization in emerging areas to maintain career momentum and advancement opportunities.

Can I change my email address?

Your Email address on CourseCorrect is linked to your business account. To change your email address, you'll need to update it through your business account provider's settings. The change will automatically reflect in your CourseCorrect account the next time you log in.

How do I delete my account?

Currently, there is no self-service account deletion option available. However, you can log out of your CourseCorrect account at any time using the log out button. If you need your account permanently removed, please contact our support team for assistance with account deletion.

6.3 Features and Functionality

How accurate are CourseCorrect recommendations?

Cora delvier relevant suggestions by analyzing:

- Your stated goals and experience level
- Popular courses among similar learners
- Real-time quality indicators
- Authenticated reviews from actual students

The more specific information you provide to Cora about your goals and background, the more accurate and personalized your recommendations become.

How can I compare courses?

You can chat with Cora and ask it to compare courses you're interested in. Cora will provide your options' pros and cons, helping you make infomred decisions based on your goals and learning needs.

Can I track multiple career goals?

Yes! You can explore multiple career paths by:

- Using Cora to explore different career options
- Bookmarking/saving courses manually
- Comparing career options by reviewing the career insights section for each course

Does CourseCorrect handle course transactions?

No. CourseCorrect is a discovery platform that:

- Directs you to providers for enrollment.
- Displays all pricing in the "Course Details" section.
- Never process payment directly.

Are course reviews trustworthy?

Yes! CourseCorrect authenticates all course reviews to ensure genuine insights from real learners. It's provide transparent, honest feedback to help you make informed learning decisions.

How often is content updated?

CourseCorrect continuously updates its course database to ensure you have access to the latest offerings from all provider platforms. New courses are added regularly as they become available from our partner providers.

How can CourseCorrect help me advance in my career?

CourseCorrect helps you stay ahead by providing personalized recommendations in growing fields like AI, data science, and technology. Its career insights show job roles, salary ranges, and growth potential to guide your learning path.

6.4 Pricing & Plans

How much does CourseCorrect cost?

CourseCorrect is completely free to use. There are no subscription fees, hidden cost, or premium tiers—all feature are available to every user at no charge.

What's included?

All users have access to every feature:

- Unlimited course searches.
- Full access to Cora, AI course matching assistant.
- Complete course details and overview
- Course filtering tools
- Save or bookmark capabilities

How does CourseCorrect make money if it's free?

CourseCorrect earns affiliate commissions from course providers when you enroll through the CourseCorrect platform. There's no additional payment using CourseCorrect.

6.5 Privacy & Security

How is my data protected?

CourseCorrect takes a minimal data collection approach to protect your privacy. When you log in using your business account, CourseCorrect only requests access to your name and email address. The platform focuses on helping you find courses without building detailed user profiles.

Who can see my profile information?

Your porfile information is private and only accessible to you and CourseCorrect's system for account authentication purposes. Your profile data is used solely for account access and platform functionality.

Can I make my profile private?

Since CourseCorrect only collects your name and email address for basic authentication, there are no additional privacy settings to configure. Your information is already kept private by default, so there's minimal data that would need additional privacy controls.

How does CourseCorrect use my data?

CourseCorrect uses your data in very limited ways:

- Name and Email address: Only for account authentication and login purposes
- AI conversations: Cora references your previous conversations to provide better recommendations, but only when you actively ask questions. Your search history and browsing patterns are not used for AI recommendations. You can delete all conversations or reset your chat history with Cora AI at any time.

6.6 Technical Support

What browsers work best?

CourseCorrect work on all major browser including Chrome, Firefox, Safari, and Edge. For optimal performance, using the latest version of browser is recommended.

Is offline access available?

No, offline access is not available. CourseCorrect is a web-based platform that requires a stable internet connection to function. A stable boradband connection is the best experience, through basic internet speeds are sufficient for course browsing and AI interaction.
How do I report bugs?

If you encounter any technical issue while using CourseCorrect, you can contact through the official channels listed at the end of the platform page.

Can I share ideas or feedback about the platform?

Absolutely! As a new platform, CourseCorrect is actively seeking user feedback and ideas to improve the user experience. Whether it's about new features, user interface improvements, or any other ideas that could make course discovery better.

To submit feedback:

1. Click the `menu` button on the top-right corner
2. Select "Roadmap" from the menu options
3. On the Roadmap page, click the feedback menu
